International Law is a branch of law that governs the relations between states and international organizations. It is a complex and dynamic field that covers a wide range of issues, including human rights, international trade, and international criminal law. The study of international law is essential for understanding the global legal system and the role of law in international relations.

Legal Theory and Intellectual Property Rights

This course explores the theoretical foundations of law and the legal system. It covers topics such as legal philosophy, legal theory, and the relationship between law and society. The course also examines intellectual property rights, including patents, trademarks, and copyrights, and their impact on innovation and economic growth.

European Business Law and Economic Law

This course provides a comprehensive overview of European business law and economic law. It covers the legal framework for business operations in Europe, including contract law, tort law, and consumer protection. The course also examines the economic aspects of law, such as competition law and antitrust law.

United Kingdom Contract & Corporate Law

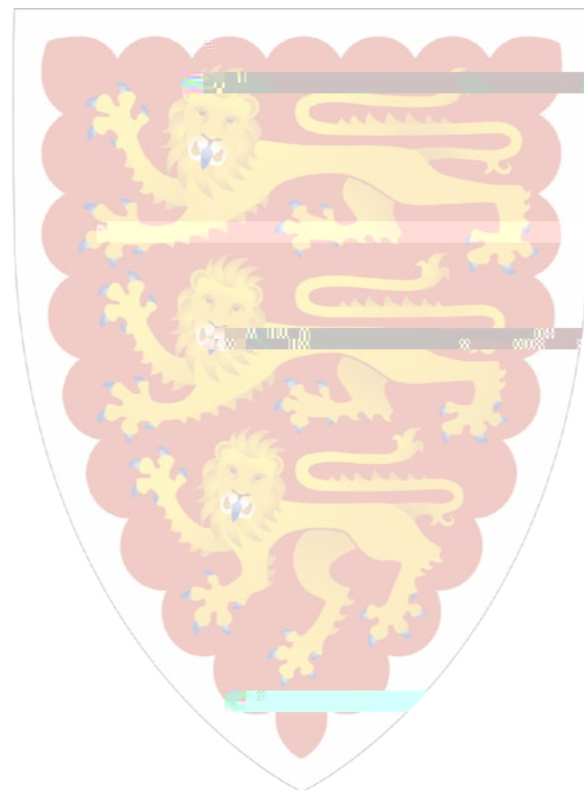

This course focuses on the legal principles and practices of contract and corporate law in the United Kingdom. It covers the formation, interpretation, and enforcement of contracts, as well as the legal structure and governance of corporations. The course also examines the role of law in corporate transactions and the protection of shareholders' rights.

International Criminal Law

International Criminal Law (ICL) is a branch of law that deals with the prosecution and punishment of individuals for serious international crimes. These crimes include genocide, crimes against humanity, war crimes, and aggression. ICL is a complex and evolving field that involves the interaction of international law, national law, and human rights law.

International Trade and Maritime Law

This course examines the legal aspects of international trade and maritime law. It covers the legal framework for international trade, including the World Trade Organization (WTO) and regional trade agreements. The course also examines maritime law, including the law of the sea, shipping law, and maritime insurance.

International Law is a branch of law that governs the relations between states and international organizations. It is a complex and dynamic field that covers a wide range of issues, including human rights, international trade, and international criminal law. The study of international law is essential for understanding the global legal system and the role of law in international relations.

Global Macroeconomics

Global Macroeconomics is a branch of economics that studies the economic behavior of nations and the world as a whole. It covers topics such as international trade, international finance, and the impact of global events on national economies. The course examines the role of government in the global economy and the effects of international trade and investment.

Development Economics

Development Economics is a branch of economics that studies the economic growth and development of low-income countries. It covers topics such as the causes of poverty, the role of government in development, and the impact of international trade and investment on developing economies. The course examines the challenges of development and the role of law in promoting economic growth.

International Taxation

International Taxation is a branch of law that deals with the taxation of individuals and corporations who are active in more than one country. It covers the legal principles and practices of international tax law, including the determination of tax liability, the avoidance of double taxation, and the enforcement of tax laws across national borders.

Behavioural Economics

Behavioural Economics is a branch of economics that studies the psychological and social factors that influence economic decision-making. It covers topics such as cognitive biases, social norms, and the impact of emotions on economic behavior. The course examines the role of law in addressing behavioral issues and promoting economic well-being.

Financial Crises and Policy Responses

Financial Crises and Policy Responses is a branch of economics that studies the causes and consequences of financial crises and the role of government in responding to them. It covers topics such as the 2008 financial crisis, the Euro-area currency crisis, and the impact of global financial markets on national economies. The course examines the legal and policy responses to financial crises and the role of law in promoting financial stability.

The Euro-Area Currency Crisis: Causes and Remedies:

The Euro-Area Currency Crisis is a branch of economics that studies the causes and consequences of the currency crisis in the Euro area. It covers the period from 1992 to 2008, when the Euro was introduced and the Euro area experienced a period of economic instability. The course examines the legal and policy responses to the crisis and the role of law in promoting economic recovery.

Business & Society

Academy

The Business & Society Academy is a unique opportunity for students to gain a deep understanding of the relationship between business and society. The Academy is designed to provide students with a comprehensive overview of the various ways in which business can impact society, both positively and negatively. Through a combination of lectures, seminars, and practical exercises, students will explore the ethical, social, and environmental implications of business decisions. The Academy is open to all students, regardless of their background or current level of study. For more information, please visit our website at www.bu.academy.

Historic Political and Economic Philosophy

This module explores the foundations of political and economic thought, from ancient Greece to the Enlightenment. Key thinkers such as Aristotle, Plato, and John Locke are examined, along with their influence on modern political systems and economic theory.

Contemporary Political and Economic Philosophy

This module examines contemporary political and economic theories, including liberalism, socialism, and environmentalism. It explores the challenges of globalization, inequality, and the role of the state in a modern world.

Ethics and Global Issues

This module focuses on the ethical dimensions of business and global issues. It addresses topics such as human rights, environmental sustainability, and the moral responsibilities of corporations in a globalized world.

Critical Thinking

Critical thinking is a key skill for success in business and society. This module teaches students how to analyze complex information, identify biases, and make informed decisions. It covers topics such as logical reasoning, argument analysis, and problem-solving.

Critical thinking is a key skill for success in business and society. This module teaches students how to analyze complex information, identify biases, and make informed decisions. It covers topics such as logical reasoning, argument analysis, and problem-solving.

Intercultural Communication

In a globalized world, effective communication across cultures is essential. This module explores the differences in communication styles, values, and business practices across various cultures, helping students to navigate cross-cultural interactions.

Business and Legal Communication

Business and legal communication is a vital skill for students in business-related fields. This module covers the basics of legal language, contract law, and the importance of clear communication in business transactions. It also explores the role of communication in resolving disputes and managing risk.

Academic Writing

Academic writing is a fundamental skill for students in higher education. This module provides a comprehensive guide to writing essays, research papers, and dissertations. It covers topics such as research methods, citation styles, and the structure of academic writing.

English Literature

Students will explore the history of English literature from the Middle Ages to the present day. The course will cover a range of genres, including poetry, drama, and prose. Students will also study the social and cultural context of the literature they are reading.

Culture and Communities in 20th Century Britain

Students will explore the social and cultural changes in Britain during the 20th century. The course will cover a range of topics, including the impact of the two world wars, the rise of the welfare state, and the changing roles of men and women. Students will also study the development of the British Empire and the process of decolonisation.

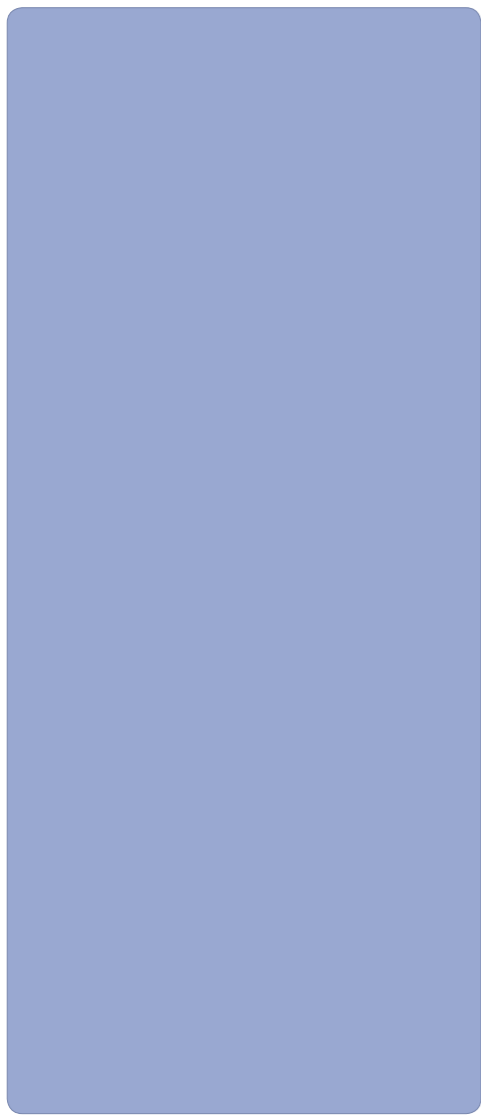

STEM (based in Oxford)

Students will explore the history of science and technology from the Middle Ages to the present day. The course will cover a range of topics, including the scientific revolution, the industrial revolution, and the development of modern science and technology. Students will also study the impact of science and technology on society.

Natural Science (based in Cambridge)

Students will explore the history of natural science from the Middle Ages to the present day. The course will cover a range of topics, including the scientific revolution, the development of modern science, and the impact of science on society. Students will also study the history of the natural world and the development of the modern world.
